Accessories

Ball Valve Proximity Sensor

The proximity sensor can detect objects in the immediate vicinity of the "sensitive side" of the sensor, without having to actually make physical contact. The absence of mechanical actuator mechanisms and physical contact between the sensor and the object makes these sensors extremely reliable.

Features

- Inductive (normally closed) or proximity type
- M8 thread
- 2 m cable

VALVE SIZE	VOLTAGE SUPPLY	SENSING DISTANCE	THREADED	LENGTH SENSOR	LENGTH CABLE
1/4" - 3/8" - 1/2" - 3/4" - 1"	Inductive - normally close	1.2 mm	M8	33 mm	2 m
1" 1/4 - 1" 1/2
