Alarm Repeater Module

The module is a medical device used to control alarms in medical gas distribution systems. It complies with Directive 93/42/EC and 2007/47/EC, and is classified in class IIb on the basis of the requirements of Annex IX, Regulation 9.

Features

- Compact 35x100x60 mm

Standards

- EN 60601-1
- EN 60715
- DIN 43880
- EN ISO 7396-1
- Directive 93/42/EEC
- Directive 2007/47/EC
- Class IIb medical device

Components

- Input voltage: 24 V~, Power: 5 VA (max)
- Alarm input with volt-free contact or powered by 24 V external power supply
- Activation signal inversion jumper
- Power ON green LED bar
- Flashing red alarm status LED bar
- Intermittent buzzer signals alarm status
- RTU (Remote Telemetry Unit) for the supervision system
- Can be mounted on DIN rails (EN 60715) in accordance with Standard DIN 43880
- Number of modules: 2M.CE0051 certified
- Acoustic alarm pressure > 70 dB @ 1 m
- Operating temperature 0-60 °C; storage temperature 20-70 °C

WIDTH	HEIGHT	DEPTH	WEIGHT
35 mm	100 mm	60 mm	0.8 kg
